

This will be used with link that will be created

Button check

This will be a separate class but will be name of check in

~~check in~~

1. open dialog box of Hard drive (network)
2. select file
  - will check if file is checked in (if True will not let you recheck in)
  - else: will check file back into sharepoint
3. This part will also need to ~~generate~~ a link to click for easier Navigation.
